CAUTION

Atlas Plan is in no way liable for "improper" use of the material, which is why it recommends to:

- Prevent shocks at the most exposed points such as corners and edges, both with and without ledge;
- Avoid the use of metal or abrasive straws;
- Refrain from using knives with ceramic blades as the hardness of the two materials is very similar;
- Provide protection systems, such as wooden and/or plastic cutting boards, when cutting foodstuffs on surfaces having a dark colour and/or a Polished or Satin finish;
- Precautiously protect the surface from direct contact with hot objects (e.g. frying pans, pots, coffee pots,etc. ...) using trivets.

Note: for the repair of shallow surface scratches in the various finishes, please refer to your Atlas Plan contact person directly.
Atlas Plan slabs must be cut in accordance with the instructions in the technical manual; any breakage due to a cut made other than specified will not be the responsibility of Atlas Plan.
The Technical Manual illustrates how to properly clean any type of stain that can be detected on an Atlas Plan surface; use the indicated products in case extraordinary cleaning is required.
It is understood that Atlas Plan cannot be held liable for events, damage or defects due to careless cleaning and maintenance.

PRECAUTIONS VELVETECH

SURFACE FEATURES

- Velvet is a delicate surface that requires proper care.
- Velvet is a surface that features irregularities, streaks, and superficial halos, particularly visible under oblique or reflected light.
- The Velvet finish may show noticeable marks, caused primarily by contact with metal objects (e.g. metal legs of chairs and furniture) and other abrasive materials. To best protect and preserve it, it is essential to follow the cleaning and maintenance guidelines

CARATTERISTICHE DELLA SUPERFICIE

- Velvet è una superficie delicata che merita attenzione.
- Velvet è una superficie che presenta irregolarità, screziature e alonature superficiali, visibili soprattutto alla luce radente.
- La finitura Velvet può mostrare segni particolarmente evidenti sulla superficie, causati soprattutto dal contatto con oggetti metallici (es. piedini in metallo di sedie e mobili) e altri materiali abrasivi. Per preservarla al meglio, è fondamentale seguire le indicazioni di pulizia e manutenzione.

DAILY CLEANING & CARE

- Do not use detergents with waxing, polishing, or shining properties.
- Do not use steel wood pads or excessively abrasive materials.
- Clean with a damp cloth and diluted neutral detergent, or use a scrubber dryer with soft nylon brushes for large areas, following the manufacturer's instructions.
- Periodic cleaning with a melamine brush and diluted alkaline detergent is recommended, following the manufacturer's instructions.
- In humid environments or those with organic residues (e.g., limescale or staining agents), use an acid-based detergent and rinse thoroughly, following the manufacturer's instructions.
- In spaces with outdoor exposure, use mats or dirt-trapping devices to retain moisture and dust.
- Apply protective pads to movable elements in contact with the surface (e.g., furniture and chair legs, etc.).
- During installation, use leveling spacers with anti-scratch pads.

PULIZIA E CURA QUOTIDIANA

- Non utilizzare detergenti con proprietà ceranti, brillantanti e lucidanti.
- Non utilizzare pagliette in metallo o eccessivamente abrasive.
- Pulire con panno umido e detergente neutro in soluzione diluita o lavasciuga con spazzole in nylon morbide per grandi superfici, seguendo le istruzioni del produttore.
- È consigliato effettuare periodicamente una pulizia con spazzola melaminica con detergente alacalino diluito, seguendo le istruzioni del produttore.
- In ambienti umidi o con residui organici (esempio: calcare o agenti macchianti) utilizzare un detergente a base acida, seguendo le istruzioni del produttore, ed eseguire un abbondante risciacquo.
- In ambienti a contatto con l'esterno, utilizzare tappeti o dispositivi assorbi-sporco per trattenere umidità e polvere.
- Applicare protezioni agli elementi mobili a contatto con la superficie (Esempio: piedini di arredi di mobili, sedie etc.).
- Utilizzare distanziatori livellanti con pedane anti-graffio durante la posa.

INDICATIONS OF USE

- Recommended for low-traffic flooring, preferably for residential use (e.g., bedrooms, living rooms, studies, private kitchens, private bathrooms, etc.).
- Not recommended for flooring where anti-slip performance is required.
- Recommended for flooring with a coefficient of friction (DCOF) >0.42 Wet (ANSI A326.3).
- Please note that the indication for use is purely indicative, and it is always the designer's responsibility to assess the suitability of the product for specific use conditions and local regulations, taking into account the variables of the intended environment.

INDICAZIONI D'USO

- Consigliata per pavimenti a basso traffico, preferibilmente ad utilizzo residenziale (Esempio: Camere da letto, soggiorni, studi, cucine private, bagni privati, etc.).
- Non consigliata per pavimenti dove è richiesta resistenza antiscivolo.
- Consigliata per pavimenti con grado di coefficiente di attrito di DCOF (ANSI A326.3) >0,42Wet.
- Si rammenta che l'indicazione d'uso è da ritenersi puramente indicativa e che è sempre compito del progettista valutare l'idoneità del prodotto alle condizioni specifiche di utilizzo e alle norme locali in funzione delle variabili che si possono verificare nell'ambiente di destinazione.

CLEANING & MAINTENANCE AFTER LAYING

- Always perform a preliminary cleaning test, regardless of the grout used (cementitious grout, class CG-EN 13888 in contrast or epoxy grout, class RG-EN 13888).
- For cementitious grout, use a buffered acid cleaner and rinse thoroughly, following the manufacturer's instructions.
- For epoxy grouts, remove residues before they harden and use specific cleaners, following the manufacturer's instructions.

PULIZIA E MANUTENZIONE DI FINE CANTIERE

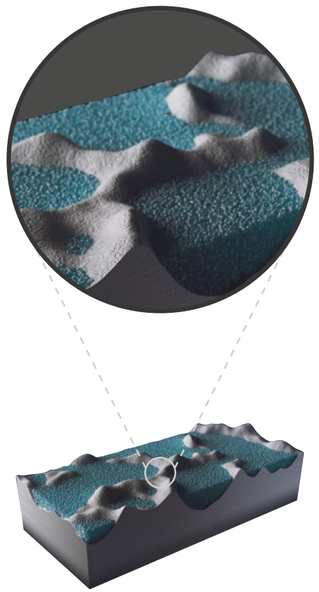

- Eseguire sempre una prova di pulizia preliminare, qualsiasi sia lo stucco utilizzato (stucco cementizio classe CG-EN 13888 a contrasto o stucco epossidico classe RG-EN 13888).
- In caso di stucchi cementizi, utilizzare un detergente acido tamponato poi risciacquare abbondantemente, seguendo le istruzioni del produttore.
- In caso di stucchi epossidici, rimuovere i residui prima che si induriscano e utilizzare pulitori specifici, seguendo le istruzioni del produttore.

Блеск и легкая очищаемость являются результатом глубоких исследований, направленных на создание долговечного материала. Если плитка находится в непосредственном контакте с наружной средой, необходимо предусмотреть устройства поглощения влаги и грязи во избежание образования царапин.
